

Veterinary prices vs inflation — 20 markets, 2017–2025

WIDEST GAP

+65 pts

Bulgaria, vet prices over inflation

BELOW INFLATION

9 of 20

incl. Greece -16, Norway -9

SHARPEST MOVE

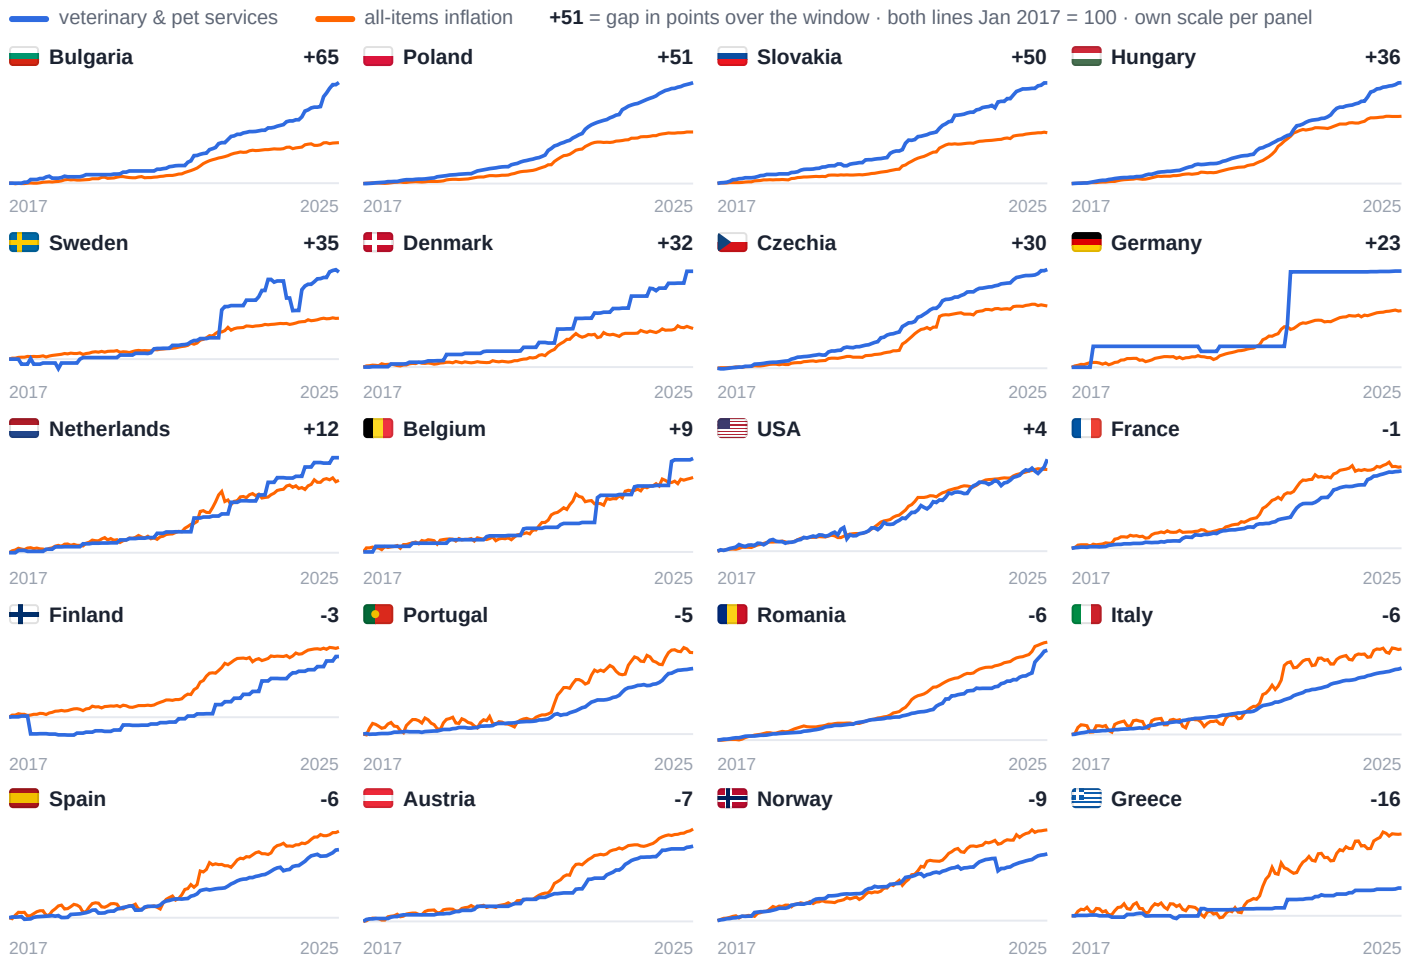

+24%

Germany, one month (Dec 2022)

UNITED STATES

+4 pts

11th of 20 markets by gap

SCOPE AND EXCLUSIONS

Measure. Consumer price indices: what households pay for veterinary and other pet services, versus all-items inflation. Not farm animal health spending.

Excluded. Türkiye — publishes no vet-services price index (all-items HICP only). Ireland — vet-services series ends Dec 2023.

Reading. Both lines are indexed to Jan 2017 = 100; each panel has its own vertical scale. The panel figure is vet-services inflation minus all-items inflation over the window, in percentage points.

DATA NOTES AND SOURCES

Known steps. Germany +24% (Dec 2022, national fee-schedule revision) and Sweden +18% (Oct 2022) are repricings in the underlying series, not data breaks. No methodology break spans the window.

Sources. Eurostat prc_hicp_midx, monthly, 2015=100 — CP0935 veterinary and other services for pets vs CP00 all items. US: BLS CPI via FRED, monthly, NSA — CUUR0000SS62031 pet services incl. veterinary vs CPIAUCNS.
