

Meat vs the food basket — 28 markets, 2021–2025

MEAT OUTPACED FOOD

12 of 28

markets, Jan 2021 → Dec 2025

MEAT FELL BEHIND

12 of 28

4 ended flat (within ±1%)

TOP

Türkiye +27%

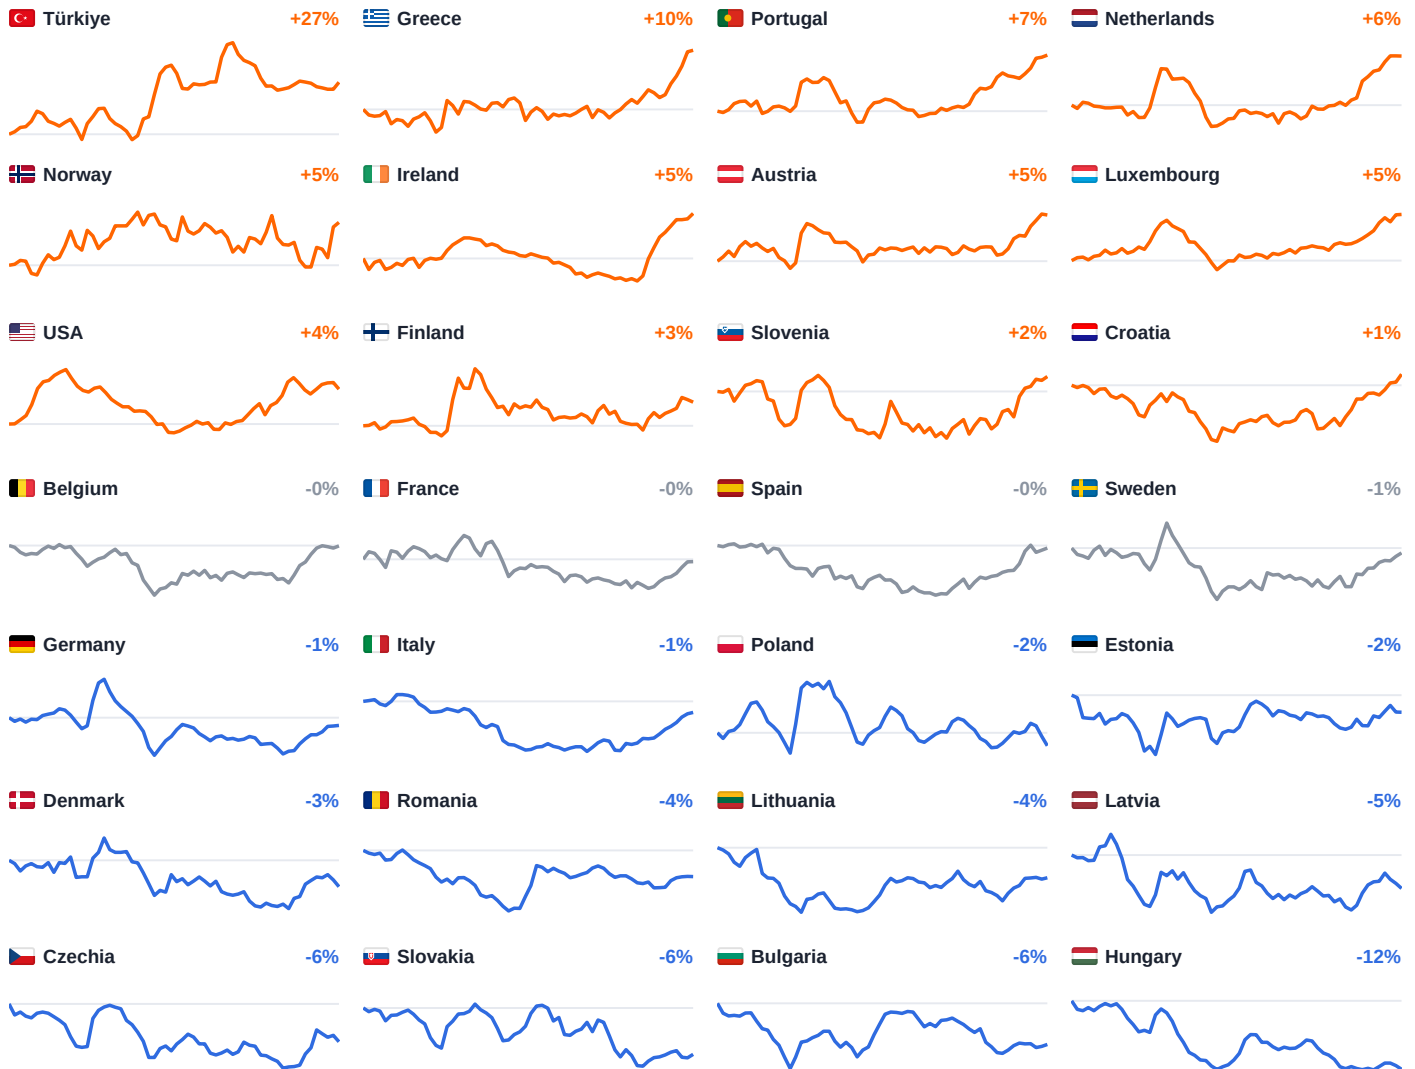

meat vs the rest of the basket

BOTTOM

Hungary -12%

meat got relatively cheaper

Each panel: price of meat ÷ price of the whole food basket, Jan 2021 = 100, own scale. — meat outpaced food — meat fell behind. Number = change by Dec 2025.

READING

Why a ratio. Dividing the meat index by the food index cancels the general inflation level, so a high-inflation market (Türkiye) and a low-inflation one (Ireland) are compared on the same footing.

Definitions. EU/EEA/Türkiye: HICP class CP0112 "Meat" (fresh, frozen and processed meat incl. poultry) vs CP011 "Food". US: BLS "meats, poultry, fish and eggs" vs "food at home" — a wider basket than the EU meat class, stated wherever shown.
